Our expert counsellors will hold space
and guide you through your processes

□ NAIKAN THERAPY

Naikan introspection therapy is a
wonderful way to get back in touch with
yourself

□ IRM

FREE lifetime membership to the IRM –
Ibogaine Recovery Movement online
meetings and recovery community

“Feeling possessed by the crack bite, is the loneliest, darkest,
sickest, most ugly, gnawing, unbelievable and truly captivating,
all consuming, demonic place to be.”
~Todd Gibson

Iboga is as effective in interrupting
stimulant addiction as it is with
opioids. Our approach to
cocaine/crack is to combat the
aggressive nature of the addiction and
its effects on the nervous system by a
mixture of holistic treatments and
iboga.

While the half-life of crack and cocaine
is only a few days, the long-term
effects of these stimulants on the
nervous system is deep and long-
lasting. Users often find long-term use
adversely affects their brain, heart,
intestines, kidneys, even their sexual
function.

Both Ibogaine and cocaine/crack
cocaine are heart rate accelerators.

Our medical procedure requires
abstinence from stimulant use for 3
days prior to the treatment
commencing.

This restriction applies equally to
methamphetamine, ephedra, Ritalin,
Vyvanse, Adderal and other ADHD
prescriptions. As part of a rigorous
medical check, a urine test will be
carried out on arrival at the retreat to
ensure that a 7-day break from
stimulant use has been followed.

For a bright future, a new beginning, a
return to your authentic playful self,
ibogaine therapy is the way.
